### WORK EXPERIENCE

12/2021 - 01/2022

#### Build 3SP; Desktop Application

- Create a desktop application using JavaScript with ElectronJS and VueJS as a frontend framework
- The application stores private keys (passwords, tokens...) and encrypt them. Then, stores them locally on the user's machine.
- The application allows the users to share the keys encrypted from a machine to another
- Created the landing page of the application on: [3sp.medostudios.com](http://3sp.medostudios.com)

02/2021 - 10/2021

#### Build Autodrive Maroc; Web application

- Created a web application with TALL Stack (TailwindCss, AlpineJS, Livewire and Laravel).
- This SaaS is a solution for car rental in Morocco, where users can find car rental offers (And book them online – on the future).
- The App offers a paid service named ADM Premium. This feature helps the cars to stand on the top of the list (According to a score system).  
[Autorive.ma](http://Autorive.ma)

10/2020 - 11/2020

#### Build Tabarro3; Web application

- Created a SPA web application with Laravel, Vue and Vuetify.
- The application a Moroccan online platform for blood donation.
- The purpose is to create a commune environment to enable citizens to find blood donors.
